SRIDHAR MOORTHY

Python Full Stack Developer

Salem | 7603964384 | srijayashree365@gmail.com | https://github.com/smartsridhar112-cmyk| Linked in

PROFESSIONAL SUMMARY

Motivated Python Full Stack Developer with strong knowledge of Django, HTML, CSS and JavaScript. Skilled in building responsive web interfaces, managing MySQL databases, and developing REST APIs. Hands-on experience through academic and personal projects, including food ordering system with cart and payment integration (Razor pay) and student management system using Django REST framework. Passionate about clean, minimal code, debugging and creating user-friendly applications.

KEY SKILLS

- Programming Language: Python.
- Backend Framework: Django – MVT Architecture and REST framework.
- Frontend: HTML5, CSS3, Java Script.
- Frontend Framework: React JS, Bootstrap5
- Database: MySQL, SQL lite.
- Tools: Git and GitHub, IDLE, VS Code, My SQL Workbench, Postman.

EDUCATION

- B. Com Co-Operative | Government Arts College (Autonomous) Salem | 2022-2025.

PROJECTS

Student Management System – (Django + DRF)

- Designed and implemented a RESTful API for managing student records (CRUD operations: add, edit, delete, view).
- Built frontend pages (Add Student, Edit Student, Student List, Delete Student) using HTML, CSS, Java Script with dynamic data rendering via fetch ().
- Developed serializers and models to handle student data (name, age, DOB, course).

Dine Ease – Restaurant Management System (Django MVT + Razor Pay)

- Developed a Full-stack web application for food menu ordering in restaurants.
- Implemented category-based food menus (Veg / Non-Veg) with dynamic routing.
- Configure MySQL Database and resolved migration conflicts with custom User models.

TRAINING

- React JS Course (on going) | Livewire Institute Salem.
